Consent to evaluation and adjustment of a minor child

Chiropractic care is very safe and effective for many conditions. However with any form of healthcare no one can guarantee results and there potential risks and rare complications that you should be informed about. These include although not limited to muscle and joint soreness or strains, nausea and dizziness, fractures, disc injuries, strokes (or like episodes) and an exacerbation and/or aggravation of the underlying condition. Often these potential risks and complications cannot be anticipated.

The most serious potential injury is that of a stroke and its risk is estimated to be one incident in every 1 to 5.8 million adjustments. These are that rare that 24 out of 25 chiropractors practicing full time for 40 years will never see one.

Your answers to this confidential questionnaire will help ensure any risks are minimized and that appropriate care is provided. We rely on the accuracy and completeness of what you tell us.

We comply with the Privacy Act which details what information is collected, how it is used or disclosed, how each patients records are kept and made accurate. We do not share your information with other people without your prior permission. At all times your comfort and peace of mind is important so please tell us if you have any concerns.
Please remember, if at any stage you have other questions or concerns feel free to ask.

DO NOT SIGN the following until you have spoken with your Chiropractor:

I understand the above, have been given the opportunity to ask questions and have been satisfied with the answers. Having discussed and understood the Chiropractors recommendations, I grant permission for care to proceed. I understand I can withdraw this permission at any time.

I _____ being the parent or legal guardian of _____
(print name of consenting adult) (print name of minor)
Have read and fully understand the above terms of acceptance and hereby grant permission for my child to receive chiropractic care.
